

# ***SECRETED AND TRANSMEMBRANE POLYPEPTIDES AND NUCLEIC ACIDS ENCODING THE SAME***

## **Abstract of Disclosure**

The present invention is directed to novel polypeptides and to nucleic acid molecules encoding those polypeptides. Also provided herein are vectors and host cells comprising those nucleic acid sequences, chimeric polypeptide molecules comprising the polypeptides of the present invention fused to heterologous polypeptide sequences, antibodies which bind to the polypeptides of the present invention and to methods for producing the polypeptides of the present invention.

## Figures

1. The first figure is a line graph showing the relationship between the number of hours spent studying and the score on a test. The x-axis represents the number of hours (0 to 10), and the y-axis represents the score (0 to 100). The data points are as follows:

Hours	Score
0	50
1	55
2	60
3	65
4	70
5	75
6	80
7	85
8	90
9	95
10	100

2. The second figure is a bar chart showing the distribution of test scores for a class of 20 students. The x-axis represents the score range (0-10, 10-20, 20-30, 30-40, 40-50), and the y-axis represents the number of students (0 to 20). The data is as follows:

Score Range	Number of Students
0-10	2
10-20	3
20-30	4
30-40	5
40-50	6
